node.md 6/6/2021

Tự xây dựng Fetch cơ bản theo Thunk Pattern

```
const promiseObj = fetch('https://zendvn.com/api/1')
promiseObj.then(response => {
   console.log('?. Hello response', response);
}, error => {
   console.log('?. Hello error', error);
})
```

```
fetch('https://zendvn.com/api/1')
   .then(response => {
      console.log('?. Hello response', response);
}, error => {
      console.log('?. Hello error', error);
})
```
